

HOME MONITORING & CONTROL SYSTEM

Release Notes

Motorola Home Monitoring & Control System

This document provides a new software enhancement available to download. For the latest information, go to the following website: www.motorola.com/homemonitoring.

Be sure to register your product with Motorola so we can notify you of available updates and product enhancements.

Connecting the USB Gateway

The USB Gateway should be plugged directly into a USB port on your PC. The Home Monitoring & Control System is not optimized for use with USB 2.0 hubs and laptop docking stations. In some instances, connecting the USB Gateway into a USB 2.0 hub or laptop docking station causes the software to periodically lose communication with the USB Gateway.

Update Applicability

A required software update applies to you if your Motorola Home Monitor & Control (HM&C) System was purchased after September 1, 2004.

Update Description

A new remote notification feature now resolves how different cellular telephone service providers send activity notifications by e-mail from your HM&C System. For cellular providers that do not notify you when a new e-mail arrives, the HM&C System now sends both a text message and an e-mail containing a still-image capture to your cellular telephone. You are immediately notified when a text message is received on your cell phone. Upon receipt of the text message, simply check your e-mail to view the still image. This new feature can also be used to send notifications to multiple e-mail addresses.

Downloading the Software Update

Please follow the instructions below to update your software remotely:

1. From your Task Bar menu click:

Programs

Motorola Home

Motorola Updates

2. Follow the directions to download the latest software for your operating system. You must have an active Internet connection to access this service.

Obtaining Help

If you need assistance with installation, system set-up, or you simply want to find out how to take full advantage of the features offered by the Motorola HM&C software application, please consult the Home Monitoring & Control System User Guide. If you need further assistance, please contact us at:

- North America: 1-877-466-8646
- Online: <http://www.motorola.com/homemonitoring>
