

Getting Started is **EASY!**

1 Plug it in

Plug in power adapter to wall outlet and insert power cord into the cell dock base; **RED** light will flash.

2 Register your Cell Dock Module

- > PRESS and HOLD the **Page/Registration** button located on bottom of cell dock. Release when light flashes **GREEN**.

- > PRESS and HOLD the **Page** button on cordless phone base unit. The **In Use** light on the base unit flashes. The LED light on the cell dock and base unit stop flashing once the registration is complete.

- > PRESS the **Connect To** button on the handset. The options will be Base Line and Cell Dock B, select Cell Dock B. The handset and cell dock can be renamed, if desired. See page 5 of manual for more details.

3 Dock your Motorola Cell Phone

Now your Motorola cell dock is registered. Insert your Motorola Cell phone into the dock. After several seconds, the light on the cell dock will turn **RED** to indicate that your cell is docked and registered. The light will turn **GREEN** when there is an incoming or outgoing call using the dock.

Access your cellular phonebook!*

Your cell dock is capable of accessing your cellular contacts every time you dock your cell phone.

To access your cell phone contacts from any SD4500 series handset:

- > Press the **ConnectTo** button on your handset and select your cell dock.
- > Press the **Left Soft Key** (PHONEBK) to access your phonebooks.
- > Next press the **Right Soft Key** (SHARED) to access the cell phone contacts.

Note: If you have a model SD4551 base unit and the SD4501 handset, the Right Soft Key label (SHARED) is missing. The Right Soft Key will still function properly.

IMPORTANT

For incoming calls when your cell phone is docked, **DO NOT** remove your cell phone from the cell dock to answer the call, please answer using one of the cordless handsets. If you do answer the cell phone directly, your cordless handsets will continue to ring. To stop your system from ringing, press **TALK** and then press **END** from the base or any handset.

*This feature may not be available with all compatible cell phones.
