WN825G and WPCI810G Firmware 6.0.3 Release Notes

Compatibility

- The features in this release are compatible with the WN825G and WPCI810G wireless adapters.
- Release 6.0.3 is compatible with all hardware versions. This software is not compatible with *GP* versions of these products.
- Release 6.0.3 supports Windows® 98 SE and Windows ME®. For users with Windows® 2000 and Windows XP™, use version 6.1.1.

Changes in Release 6.0.3

- Cisco® LEAP®, Cisco Client eXtensions (CCX) v1.0 and v2.0—supported
- Windows Help—enhanced online help for Motorola Wireless Configuration Utility
- WMM (Wi-Fi® Multimedia)—supported
- WPA2™ (Wi-Fi Protected Access version 2)—supported*

*For full WPA2 functionality, be sure to remove your current wireless adapter driver from your PC using the Windows Control Panel. Do this prior to installing the updated driver (see “How to Upgrade”).

Known Limitations

- When a WN825G notebook adapter is used on a laptop with multiple card slots, a unique profile can be maintained for each slot. If only one profile is to be used, always connect the adapter to the same slot; otherwise, the adapter needs to be configured for each slot.

How to Upgrade

To upgrade to version 6.0.3:

1 Download and save the 6.0.3 Software Update **WN825_WPCI810_6.0.3.exe** file from the Motorola Web site at the following link:

<http://broadband.motorola.com/consumers/support/default.asp>

2 Double-click the **WN825_WPCI810_6.0.3.exe** file you just saved and follow the on-screen instructions.

3 Restart your PC when Windows prompts you.

If You Need Help

If you need assistance while working with the WN825G or the WPCI810G, call the Motorola Technical Response Center (TRC):

- Inside the U.S.: 1-877-466-8646
- Motorola Online: www.motorola.com/homenetworking (click “Support and Downloads”)

The TRC is on call 24 hours a day, 7 days a week. In addition, Motorola Online offers a searchable solutions database, technical documentation, and low-priority issue creation and tracking.
