

Digital Made Easy

The Motorola DRC400 remote control is a full-featured, 4-in-1, wireless (IR), handheld, universal remote control designed specifically for the Motorola DCT2000 and DCT5000 family of interactive, digital terminals. Brought to you by Motorola Broadband Communications Sector, the powerhouse behind digital cable, this remote features an ergonomic design, easy-to-find buttons and proven reliability, making it a smart choice for you and your subscribers. In addition to backward compatibility with Motorola's earlier digital terminals, the DCT1000 and DCT1200, and the advanced analog terminals, such as the CFT3300, the Model DRC400 also controls most consumer TVs and VCRs, eliminating the need for multiple home remotes. *And it comes with batteries!*

Consumer-Friendly Design

The Motorola DRC400 remote control features easy-to-use buttons grouped by function and color-coding to quickly differentiate keys and functions. Testing has confirmed that the easy-to-read labels and sleek, compact design make the Model DRC400 a favorite among consumers.

The Motorola DRC400 remote control supports direct access channel tuning as well as popular set-top terminal features such as on-screen menus, program guides, favorite channels, last channel recall, time-controlled programming and parental control. Ordering Pay-Per-View (PPV), or Video-On-Demand programming is simple, increasing your revenue opportunities and customer satisfaction.

The remote control design reserves space for custom operator logos reinforcing brand recognition and loyalty.
